

FUNGICIDAL WASH
Updated Apr'23

Fungicidal Wash is a very effective low toxicity bacterial, fungal and algae wash which will kill all film spoilage species. It is used for surface preparation prior to painting.

Product Features:

Fungicidal Wash is used in the pre-decoration cleaning of paints, masonry, brick, wood and plastering substrate to get rid of fungus growth and to kill any remaining fungus spores left on the substrate, so as to prevent the spore from germination.

Paint Type	Product Type	Finishing	Recommended Substrate	Pack Size
Water based	Interior & exterior	Clear straw or rose coloured liquid	Masonry, brick, wood and plastering substrate	5 Litres, 20 Litres

Composition

Pigment	: Not applicable
Binder	: Not applicable
Thinner	: Not applicable

Technical Data

Drying Time	: Touch Dry	: Not applicable
	: Hard Dry	: Not applicable
Recoating Time	: Not applicable	
Dry Film Thickness	: Not applicable	
No. of Coats	: Not applicable	
Theoretical Coverage	: Not applicable	
Volume Solid	: Not Applicable	
Shelf Life	: Up to 12 months in tight sealed container	

Application Method

Brush / Roller	: Apply by painting or spraying and allow it to remain on surface for 24 hours or overnight to eliminate the fungal spore. Clean the Fungicidal Wash by water jetting with tap water and allow the surface to dry completely before proceeding to painting.
